Foreword

The Quebec Region Statistics and Licensing Division has put together **"Quebec Marine Fisheries: 2002-2003 Highlights"** to provide a general overview of all the Quebec fisheries. This supplement is not intended to replace our Annual Statistical Review, but to be consulted in conjunction with it. We feel that this supplement will provide clients with an easy-to-use, accessible source of information about the main points of interest concerning the industry. Being an overview, it contains only the essentials, and we encourage you to refer to the Annual Statistical Review for more detailed information.

This publication is divided into two parts. The first presents a statistical summary of the main indicators of the fishery workforce and resources. A series of tables shows the changes in catches of the four main species landed in Quebec between 1999 and 2003. To provide a broader picture of the fishing industry, we have incorporated information on all the Atlantic provinces. The second section outlines the changes in average landings of the largest Quebec fleets for the years 1994 to 2003. Please see p. 77 of the Annual Statistical Review for an explanation of the method used to define the composition of each fleet.

Table of contents

STATISTIC SUMMARY

- Work force and ressources sector-based distribution in 2002 for the Quebec Region 3
- Work force and ressources sector-based distribution in 2003 for the Quebec Region 4
- Landing sector-based distribution in Quebec Region in 2002 5
- Landing sector-based distribution in Quebec Region in 2003 6
- Crab landings by area in Quebec Region 7
- Shrimp landings by shoal in Quebec Region 8
- Lobster landings by area in Quebec Region 9
- Scallops landings by area in Quebec Region 10
- Value of landings breakdown according by species in 2003 12
- Atlantic Provinces landings in 2002 13
- Atlantic Provinces landings in 2003 14
- Landings by administratives regions in 2002 15
- Landings by administratives regions in 2003 16

Table of contents

- Magdalen Islands lobster fleet 31
- Gaspé Peninsula lobster fleet 32
- North Shore lobster fleet 33
- Anticosti Island lobster fleet 34
- Scallop fleet, area 16E* 35
- Scallop fleet, Gaspé Peninsula 36
- Longliners under 35 ft, Groundfish 37
- Longliners 35 to 50 ft, Groundfish 38
- Longliners over 50 ft, Groundfish 39
- Longliners under 35 ft, Pelagic fish 40
- Rock Crab 41
- Whelk 42

Statistical summary

Work force and resources distribution for the Quebec Region by geographical area in 2002

Sectors	Number of registered active licence holders (2)	Number of active licence holders in Quebec (2)	Number of registered vessels	Number of active vessels in Quebec (1)	Active quebecer vessels in Quebec	Number of commercial fishing licences	Number of buyers	Maximum number of employees in fishing plants
St. Lawrence	-	-	27	5	5	-	3	296
North Shore	383	394	494	387	347	1 807	24	1 194
Gaspé Peninsula	489	518	507	511	481	2 115	62	2 312
Magdalen Islands	387	392	404	391	386	1 801	15	808
Other	-	-	12	-	-	-	6	-
Total	**1 259**	**1 304**	**1 444**	**1 255**	**1 184**	**5 723**	**110**	**4 610**

(1) A vessel can be active in more than one maritime sector but it is entered only once within the total for Quebec. The expression "active vessels" designates any vessel having made at least one landing in any particular area

(2) Fishermen helpers are not entered anymore. In this table, the data related to the St. Lawrence are comprised with Gaspe and North Shore areas

Work force and resources distribution for the Quebec Region by geographical area in 2003

Department of Fisheries and Ocean. 2005. Quebec Marine Fisheries - Annual Statistics Review 2002-2003, 223 p.

Foreword

The hard times that the Quebec fishing industry has been experiencing in recent years underscore the importance of producing reliable statistics that are as up to date as possible. The requests for information that we receive have not only become more numerous and more pressing, but above all more complex. This is the background to this annual statistical report.

The eighteenth edition of the Annual Statistics Review of Quebec marine fisheries, produced by the Department of Fisheries and Oceans (DFO), paints a detailed portrait of the industry in 2002 and 2003. In a nutshell, in this last year, the volume of landings totalled 58 190 mt and had an associated value of close to $170 million and in 2003 the volume of landings totalled 54 709 mt and had an associated value of close to $161 million.

A supplement entitled "Quebec Marine Fisheries: 2002 and 2003 Highlights" is included in a special pocket on the back cover. This handy, comprehensive reference tool was prepared jointly by the Statistics and Licensing Division and the Policy and Economics Branch to provide a snapshot of the state of Quebe' fishing industry in 2002 and 2003.

The Statistics and Licensing Division, which is responsible for this publication, is mandated to compile, process, analyse and publish data on Quebec marine fisheries. The statistics produced are of vital importance, first, to assess and highlight the economic value of the industry, and second, to provide managers and scientists with a basis for the various analyses required for effective fishery resource management.

It is important to note that a federal-provincial agreement between DFO and the Quebec Department of Agriculture, Fisheries and Food (MAPAQ) has laid the groundwork for greater coordination in collecting data. It aims to eliminate duplication of effort by public servants seeking information from fishing industry players and to promote intergovernmental data sharing.

The three types of data in this report have been obtained in different ways. Catch data are based on the sales transactions between fishers and fish buyers when each vessel lands its catch. For data on fishing effort, used by scientists in their research work, we rely upon the excellent cooperation of skippers, who provided information on fishing grounds, type of gear, target species and species caught, among other things. Finally, statistics on fishermen, fishing fleets and licences come from the licensing process.

The quality of the data in this review depends on (a) the quantity of data that our system gathers from fishermen, buyers and processing plants, and (b) the accuracy of the data. With limited resources, the Statistics and Licensing Division does everything within its power to check the data it gathers, but cannot guarantee that everyone involved submitted all their data. We turn to resource management programs such as enterprise allocations (quota licences), for which strict monitoring methods exist, to ensure that data entered into the system are consistent with observations of landings by dockside monitors. This does not however apply to every fishery. In addition to that, consultations with Inspectors, Protection Officers, Policy and Economics Branch representatives as well as with industry representatives further enable Statistics and Licensing Division staff to produce reliable, representative data.

The descriptive narratives accompanying the tables and figures are not intended as an in-depth analysis of the state of the marine fisheries in Quebec in 2002 and 2003.

The publication of this annual review of Quebec marine fisheries has been made possible by the hard work and rigour of the Statistics and Licensing Division staff and groups in Sept Îles, Gaspé and Cap-aux-Meules. We would also like to thank the Policy and Economics Branch for its important contribution.

We wish to take this opportunity to thank the fishermen, buyers and producers for their ongoing cooperation; knowing that supplying statistics is an extra burden for them.

On an exceptional basis, we are including in this Annual Review a section entitled "Erratum" in order to provide some amended tables for the 2001-2002 Annual Review. These tables were containing some errors that we unfortunately noted only after its printing and distribution.

All of us in Statistics and Licensing Division hope that you enjoy reading this annual review and welcome any comments or ideas that might help us improve it.

Methodology

The data in this publication are taken from the statistical system of Fisheries and Oceans Canada, Quebec Region. The system consists of three components, all of which were used to produce this report: catch-effort-quotas, people-vessels-licences, and processing plant production and workforce.

Data on people, vessels and licences come from licensing paperwork. The number of licence holders corresponds to the number of people registered with the Department of Fisheries and Oceans, who operated autorized fishing gears under the terms of a commercial fishing licence in 2002 and 2003. The number of vessels is the number of fishing boats licensed in 2002 and 2003. The number of licences is the total number of fishing licences issued, but not necessarily active, in 2002 and 2003.

Data on fish and shellfish landings are provided by commercial buyers, who are required to provide us with a copy of the DFO form to record their purchases from fishermen. Each transaction of this type generally corresponds to one fishing trip. The Enterprise Allocation Monitoring Program, initiated in 1989, now covers some mobile and fixed gear vessels less than 64' 11" and some 65'-100' long, for groundfish in areas 4RST and 3PN. The program also affects all crabbers and shrimpers, as well as many scallopers and surf clam fishers. For these fleets, an additional check has to be carried on the data supplied to the Statistics Service.

It is important to note that the monetary values associated with Magdalen Islands lobster landings in 2003 are preliminary. The last price adjustments obtained from Magdalen Islands processors have not yet been accounted nor integrated in the results of this present Review. These adjustments will be taken into account and published in the next issue of this publication.

Furthermore, to estimate the volume of fish eaten by commercial fishermen and their families, the volume of fish sold directly to the public or used as bait and processed by fishermen themselves, we use data supplied by DFO fishery officers and information from fishermen's associations. **This type of data, called "supplementary purchase slips" is being included only in tables where we added a note to that effect.**

Data are gathered, coded and entered locally in each of the maritime sectors: Gaspé, Sept Îles and Cap aux Meules. The concepts and definitions used meet the standards set by the Statistical Coordinating Committee for the Atlantic Coast (STACAC) and are thus compatible with the systems of the other Atlantic regions (the Gulf, Nova Scotia and Newfoundland). Papers published by the STACAC provide more information on the concepts and definitions used here (see reference list). Some of them are available from Statistics Service at the Quebec City Regional Office.

Figures in the tables on landings have been rounded, so they may not add up to the totals shown.

It should also be noted that some data on salmon, eel, smelt, tomcod, capelin and sturgeon landings were supplied by the Quebec Ministère de l'Agriculture, des Pêcheries et de l'Alimentation (MAPAQ).

Another important point is that until 1992, seal-hunting licences were issued in the maritime sectors and did not figure in the publication of the various statistical tables on fishing licences. In 1993, the policy on licensing for the seal hunt was amended to make it much more like the ones for other types of licences, so seal-hunting licences are now counted the same way as other existing licences. To avoid skewing the trend analysis, we decided to publish the seal-hunt data separately. Statistical table 4A gives the number of seal-hunting licences according to quite specific parameters.

It should be noted that the process of gathering data at the source is the result of the Federal-Provincial Harmonization Agreement on the Quebec Marine Fisheries, the main objective of which was to eliminate duplication of effort in this area.

Maritime territory

Quebec maritime territory begins at the eastern tip of Île d'Orléans and is divided into four sectors.

The St. Lawrence sector extends from Anse à Gilles to Cap à l'Orignal (on the south shore) and from Cap Tourmente to Baie Sainte Catherine (on the north shore). The North Shore sector lies between Tadoussac and Blanc Sablon (including Anticosti Island). The Gaspé sector begins at Le Bic and stops at Matapédia. The fourth sector comprises the Magdalen Islands. For more details, refer to the map titled "Maritime Territory" on next page.

On another basis, the Quebec Region maritime territory is subdivided into 28 statistical districts. These districts are defined by limits represented by geographic points and are used in most statistical systems. This standardization makes it possible to compare the data that DFO has been collecting in Quebec since 1984 with those published by the Bureau de la statistique du Québec for previous years.

The 28 statistical districts, with their geographic limits, are listed in an Appendix.

Conventional Symbols

o	Less than half of the smallest unit used
-	Nil or zero
%	Proportion of a quantity to another expressed as a percentage
Var. %	Percentage variation indicating the size of increases or decreases from one year to the next and calculated as follows:

$$\text{Var. \%} = \left[\frac{\text{figure from target year} - \text{figure from preceding year}}{\text{figure from preceding year}} \right] \times 100$$

N.B.: All variations presented in this review refer to the years 2002 and 2003 only.

N/A	Information not applicable
N/AV	Information not available
mt	Metric ton
....	Not applicable because of different units
<>	Not publishable, because there were fewer than three buyers for this fishery (protected information)

Definitions of terms used in this publication

Active fisherman	Fisherman or fisherman's helper who has made at least one landing in the season.
Active fishing enterprise	Fishing enterprise that has made at least one landing in the season.
Active registered licence holders	Any person registered with DFO who uses fishing gear authorized by a commercial fishing licence. This definition does not cover fishermen helpers.
Active vessel	A vessel for which at least one landing in the reference year has been counted.
Actual deviation	Difference between data for the year under consideration and the preceding year.
Administrative regions	Regions defined by DFO. In this publication, we refer to the Atlantic administrative regions: Quebec Region: Encompasses the province of Quebec Gulf Region: Encompasses coastal areas of the Gulf in New Brunswick and Nova Scotia, as well as the Province of Prince Edward Island Nova Scotia: Encompasses the waters of the Bay of Fundy, the Scotian Shelf and Georges Bank which is the ocean side of Nova Scotia Newfoundland Region: Encompasses the geographic sector of the same name.
Atlantic Coast	Covers the Quebec, Gulf, Nova Scotia and Newfoundland regions.
Average Price	Total value of all landings sold divided by the total weight landed.

Buyer	Person or firm that commercially purchases fish directly from fishermen.
Certified plant	Any place that fish is processed for export or stored before exporting.
"Commercial fisherman" (southern Gulf)	In the Gulf, a commercial fisherman is a registered fisherman who does not take part in the fisheries fished by vessels with an LOA of 15.2 m (50') or longer and does not meet the requirements of a bona fide full-time or part-time fisherman.
Commercial fishing licence	Designate an instrument by which the Minister of Fisheries and Oceans authorizes, pursuant to his discretionary authority under the Fisheries Act, grants permission to a person including an Aboriginal organization to harvest certain species of fish or marine plants subject to the conditions attached to the licence. This is in no sense a permanent permission; it terminates upon expiry of the licence. The licensee, is essentially given a limited fishing privilege rather than any kind of absolute or permanent "right or property".
Conversion factor	Ratio used to convert the weight of a product or form of a product on landing into equivalent live weight.
Core	In order to qualify as a member of the core group, a person must meet the following criteria: - be the head of an active fishing enterprise, i.e., have fished full time for the previous two years (1994 and 1995) and have a vessel in the fishery; and - hold either two key licences, **OR** one key licence and in two of the years 1993, 1994 and 1995, have fished for 10 weeks with minimum reported landings of $5,000 from their own licences for vessels less than 35' and of $10,000 from their own licences for vessels longer than 35', **OR** one key licence and, in two of the years 1993, 1994 and 1995, have earned at least 75% of their income from fishing

License holders who meet the eligibility criteria for the Atlantic Groundfish Strategy (TAGS) or the Northern Cod Adjustment and Recovery Program (NCARP) may use the TAGS or NCARP qualifying years instead.

Key licences are defined as shrimp, crab, lobster, groundfish other than handline, scallop, herring and, on the Lower North Shore, capelin.

Division	NAFO (Northwest Atlantic Fisheries Organization) divisions.
Fishing day	Day in which fishing gear was used with the goal of catching fish to sell.
Gear	Any equipment used to catch fish.
Gulf of St Lawrence	Coastal areas of the Gulf in New Brunswick, Nova Scotia, western Newfoundland and southern Labrador, as well as Prince Edward Island and Quebec.
ITQ	Individual transferable quota
Landed value	Monetary value of the recorded landed quantity, that is, the landed quantity multiplied by the unit price, or the value supplied by the buyer.
Landing	Quantities of fish and shellfish (molluscs and crustaceans) landed, excluding discards, measured as live weight.
Live weight	Weight (round weight) of a live fish, which can be estimated, if necessary, on the basis of the form at landing using a standard conversion factor.
Non-core	Any fisherman not qualified for membership in the core group.
Non registered licence holders	Non registered holders of active licence refer only to companies, aboriginal fishermen, successions and to licences bought back by DFO.

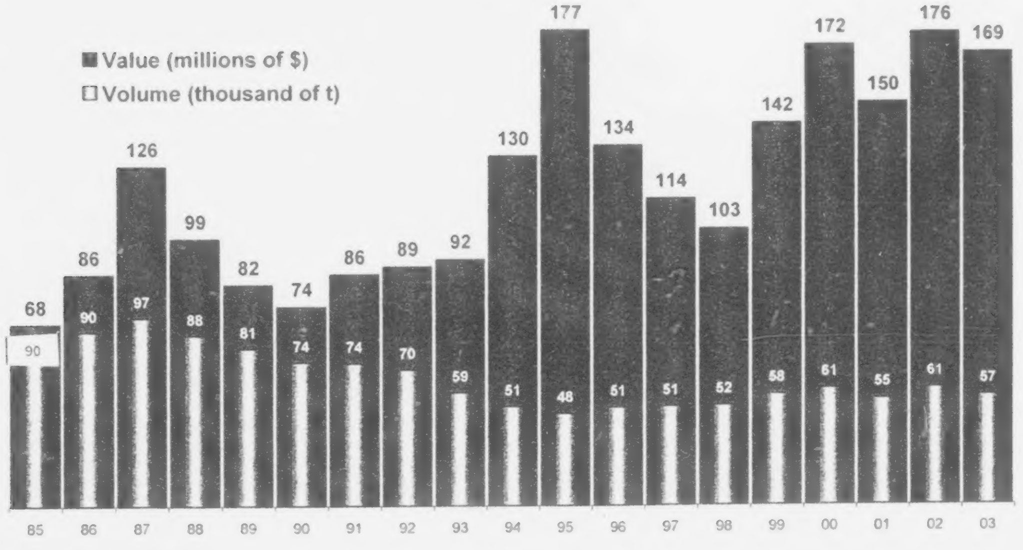
Other items	Includes sea urchins, lumpfish caviar, scallop roe, other seafood, and seal products.
Outside the Gulf of St. Lawrence	Waters of the Bay of Fundy, the Scotian Shelf and Georges Bank that is, the ocean side of Nova Scotia as well as the province of Newfoundland, not including the west coast and southern Labrador.
Quota	For a given species and fishing area, the catch limit set for a segment of the commercial fleet.
Specialized enterprise	Fishing enterprise that has recorded at least 25% of the average value of landings of its reference fleet.
Supplementary purchase slips	These data are used to compile all landings not recorded on general purchase receipts. This information comes from estimates from four different sources: Fish processed by fishermen Direct sales to the public Fish used as bait by fishermen Other landings (including personal consumption by fishermen and their families and sport fishing)
Value	Statistics on value are expressed in current Canadian dollars.

CATCH PORTRAIT OF QUEBEC SECTOR

Portrait of Quebec Sector catches for 2003

The value of Quebec landings was totalling 169 M$ in 2003, which constitutes, historically, a fourth record year. In comparison with 2002, the total value of landings has recorded a drop of 4 %, attributable in a large part to the decrease of the value of snow crab catches in 2003. Thus, the value of snow crab landings has faced a reduction of 10 M$, representing 11 % less than the previous year. Conversely, the value of lobster landings increased of 5 %, representing an additional 2 M$. An increase of the value of landings of 1.5 M$ is also observed for shrimp while groundfish has faced a decrease of close to one million dollars, representing 10 %, mainly due to reduced cod catches within the context of the cod moratory imposed in 2003. Concerning the volume landed, we had 61 000 in 2002 compared to 57 000 in 2003, which represents a decrease of 6 %. This drop is attributable to the 29 % reduction of snow crab and to the 30 % reduction of groundfish (mainly cod).

Evolution of Quebec Fishing Industry landings
1985-2003

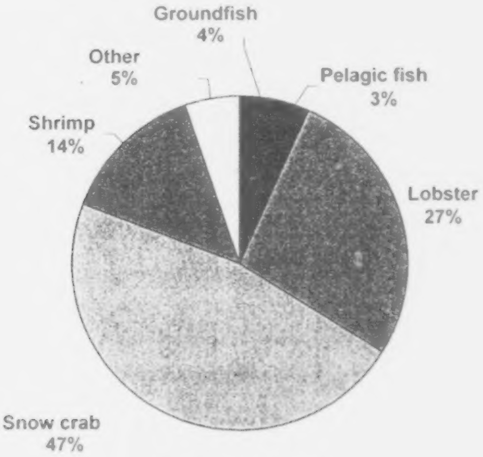


Source: DFO, Quebec Region

Note: The supplementary purchase slips are included in the landings.

The breakdown of the value of landings, according to the species, shows that snow crab stays on top with a value of 90 M$, representing 50 % of the total. The lobster is the second species in importance with a value at landings of approximately 46 M$. In the third place, we have shrimp landings with a value of the order of 24 M$. Together, these three crustaceans were representing 88 % of the value of landings in 2003. Far behind, the value of landings for groundfish and pelagic fish were respectively of 7 M$ and 4 M$ in 2003.

Value of landings breakdown according to species, 2003



Total: 169 M$

(1) The buyers are filed according to their physical location

RESOURCE

ACCESSIBILITY

Resource accessibility

In order to achieve its objective of conserving and preserving various fish stocks, DFO imposes control measures each year. Licensing and quotas are responding to this necessity.

Quotas are used to determine the quantities allocated to each fishery, while licensing is an efficient means of controlling access to the various resources.

Licences for anadromous and catadromous species are issued by the Government of Quebec, while the Federal Government looks after licensing for all other species.

(1) Refers to NAFO (Northwest Atlantic Fisheries Organization) divisions except for Shrimp where we use the management areas as established by the Department of Fisheries and Oceans.

(2) This global quota is subdivided into individual quotas and is set for Quebec fishers only.

(3) This global quota is subdivided into individual quotas.

(4) For this total, figures originating from Newfoundland, Gulf and Scotia Fundy Regions are not final.

(5) Dates indicating the duration of the fishery except for Herring where we identify the various Spring and Fall fisheries.

(6) Unit 1 is grouping together 4RST,3PN divisions (January to May) and 4Vn division (January to May) and Unit 2 is grouping together 3Pn division (June to December) and 3Ps,4Vn divisions (June to December).

(7) For this species only, quantities are indicated in meat weight.

(8) Considering that these are individual quotas, duration periods are not specified.

(9) In accordance with Access to Information Act, we are reporting landings against quotas only where there were at least three participants, unless we have the authorization from the concerned participants.

(10) In 2003, cod by-catch landings were reported as per the directed species and they cannot be reconciliated in this present document with usual quotas.

Average landed price

The average landed price by species as indicated here reflects the prices paid to fishermen and is determined by dividing the total value of all landings by the total landed weight.

The average price takes into account the condition of the catch at landing. The advantage of this method is that the significance of the price given can be specified. An identical approach is used for each of the maritime sectors.

It should also be pointed out that the average prices in the following tables exclude supplementary purchase slips, which explains why no figure is given for some species.

TABLE 14

LANDING AVERAGE PRICE BY SPECIES IN QUEBEC

ECONOMIC PROFILE OF QUEBEC MAIN FISHING FLEETS

Economic Profile of Quebec Main Fishing Fleets

The Annual Statistics Review 2002-2003 proposes a section intended to the Quebec main fishing fleets. You will then find in the following pages, information related to the fleet size, the manpower, the fishing effort as well as the average landings for these various Quebec fleets.

In order to characterize each fleet, we have classified them by main species landed, and in some cases, by fishing area, gear type and vessel length. In addition, landings and average prices are always calculated on the basis of what is known as a specialized fleet, or calculated for a fleet composed of specialized enterprises. Specialized fishing enterprises are those for which the total value of their landings is equal to at least 25 % of the average value of their fleet.

Please note that the scallop fleets for the North Shore and Magdalen Islands, as weel as the inshore fixed gear fleet for 35-50' vessels (for pelagic fish), have very few participants. Consequently, for confidentiality purpose, we cannot provide their landings information.

In conclusion for this section, we have included a graph illustrating changes in average landings over the last years for each fleet.

Shrimpers economic profile, group A

Fleet caracteristics	**2002**	**2003**

2002 - 2003 Landings
St. Lawrence

The St. Lawrence Sector is distinguished by a low level of marine fishing activity. Landings made in 2002 and in 2003 for the sector between Anse à Gilles and Cap à l'Original on the south shore, and between Cap Tourmente and Baie Sainte Catherine on the north shore, represented respectively 49 and 178.9 metric tons for an assorted value of 0.05 and 0.34 million of dollars. Thus, 2003 landings are higher in quantity and their value has increased very substantially of 598.7 % compared to 2002.

In 2003, we had 25 active registered licence holders, the same licence holders number than in 2002. Concerning the number of buyers, we observe an unchanged status with 2002, with a total of 3 buyers each year.

To abide by confidentiality regulations, it is not possible for the Department to reveal any information concerning St. Lawrence sector landings. The small number of participants in marine fishery activities as well as the small amount of catches justify the application of such a confidentiality measure.

2002 - 2003 Landings
Northern Quebec

The Department of Fisheries and Oceans has no registered data for 2002 and 2003 for the Northern Quebec Sector.

PRODUCTION AND MANPOWER IN PLANT

Plant production data

This section concerns fish and seafood processed in Quebec in 2002 and 2003. In this review, production refers to any processing by a plant or any sale of a product to a merchant who buys directly from fishermen. Most of the enterprises listed here are located in the Gaspé, the Magdalen Islands or on the North Shore. Our data-collection network is concentrated in these three regions, although we did obtain information from a few firms in the Quebec City and Montreal areas.

The volume of the various products listed is based on information provided by each of the processing plants and merchants. Value is calculated on the basis of selling prices for each type of seafood.

Some figures were adjusted if there were discrepancies with the rest of the available data. When making these adjustments, we used the following information as reference points: purchase value of raw material, value of same types of products when processed and, wherever possible, from the same geographic sector, the selling price of the preceding year taking into account variations in prices and inflation.

The data are given for the whole of Quebec and by maritime sector. Note that for reasons of confidentiality, in some cases we have grouped a number of products together.

Plant workforce data

The number of employees in the 2002-2003 statistical review represents the maximum number of people who worked in the same plant over the course of the year (the month with the highest number of employees was used as the yardstick). This method of accounting is based on the following definition of an employee: "An employee is any person working for a definite period for an employer operating an establishment that processes or deals in any seafood product."

The annual employment survey of processing plants is the source of our information on employment. A few plants, however, provided us with employment information over the telephone. In a few rare cases, we made estimates, based on information gathered by DFO staff.

TABLE 48

ERRATUM

For the 2001-2002 Annual Review

Amendments to the 2001-2002 Annual Review

In this section entitled "Erratum" we are including for your guidance, a few tables of the 2001-2002 Annual Review which were unfortunately containing some mistakes.

On table 40 and 41, numbers have been modified for Newfoundland for 2001 and 2002.

APPENDICES

APPENDIX 1

Boundaries of Quebec maritime statistical districts

District	Geographic point	Landing point
1	Anse à Gilles to Pointe Rouge	Anse à Gilles to St-Roch-des-Aulnaies
2	Pointe Rouge to Notre-Dame du Portage	Ste-Anne de la Pocatière to St-André
3	Notre-Dame du Portage to Ste-Luce	Notre-Dame du Portage to Cap-à-l'Orignal
4	Ste-Flavie to eastern boundary of Matane County	Ste-Flavie to Petits Méchins
5	Cap-Chat to Duchesnay	Fonderie to Ruisseau Castor
6	Duchesnay to St-Hélier	Ruisseau à Rebours to Anse à Thibault
7	St-Hélier to Petite Rivière-au-Renard	Ruisseau à l'Ail to Petit Cap
8	Petite Rivière-au-Renard to Cap des Rosiers	Petite Rivière-au-Renard to Cap des Rosiers
9	Cap Gaspé to Pointe St-Pierre	Cap Gaspé to Pointe Navarre
10	Pointe St-Pierre to Brèche à Manon	Malbay to Weygand
11	Brèche à Manon to Pointe Maquereau	Brèche à Manon to Newport
12	Pointe Maquereau to New Carlisle	Pointe Maquereau to Cullens Brooks
13	New Carlisle to Rivière Grande-Cascapédia	New Carlisle to St-Siméon ouest
14	Rivière Grande-Cascapédia to Pointe Miguasha	Maria to Pointe Bourg
15	Pointe Miguasha to Rivière Restigouche	Miguasha to Matapédia
16	Cap Tourmente to Rivière Saguenay	Petite Rivière St-François to Cap-Brûlé
17	Rivière Saguenay to Bersimis	Tadoussac to Anse à Bouleau
18	Bersimis to Rivière Ste-Marguerite	Bersimis to Îles de May
19	Rivière Ste-Marguerite to Rivière Pigou	Sept-Îles to Maliotenam
20	Rivière Pigou to Havre St-Pierre	Rivière aux Graines to Rivière Pigou
21	Havre St-Pierre to Rivière Kégaska	Havre St-Pierre to Pointe Parent
22	Rivière Kégaska to Baie des Moutons	Rivière Kégaska to Chevery
23	Baie des Moutons to Bonne Espérance	Baie des Moutons to Rivière St-Paul
24	Bonne Espérance to Blanc Sablon	Bonne Espérance to Îles Demoiselles
25	Île d'Anticosti	Anticosti
26	Îles-de-la-Madeleine, northern division	Havre-aux-Maisons to Lapointe
27	Île du Havre Aubert to l'Île d'Entrée	Havre Aubert to l'Île d'Entrée
28	Île de Cap-aux-Meules	Cap-aux-Meules to Cap Vert

NB : The geographic points that mark the boundaries of the statistical districts are shown here with the corresponding points of landing. There are thus two types of boundaries for each district.
